

Lynton Riser Recliner

Gerald Shotton
FURNISHINGS

Features & Dimensions

Designed with full powerlift facility to assist sufferers of arthritis, rheumatism, MS, poor circulation and many other mobility restrictions.

Special TOUCHSTOP ANTI-ENTRAPMENT SYSTEM for added reassurance.

Optional LUMBAR ADJUSTMENT for added comfort.

5 YEAR GUARANTEE on all Recliner actions, frames, motors, handsets and all other electrical parts.

Single-use Emergency Back-up fitted as standard and Multi-use Battery Back-up available at extra cost.

Supplied with castors for ease of movement. Front castors lift away to ensure stability in raised positions. Glides now available as an alternative to castors for solid flooring.

Supplied with removable back to make the task of delivering the Recliner into your home so much easier.

Maximum recommended weight 160kg (25 stone).

SINGLE and DUAL motor options available

The Single Motor and Dual Motor actions both lift and tilt the Recliner forwards so that getting in and out is the easiest thing imaginable. This full powerlift facility is designed to assist sufferers of arthritis, rheumatism, MS, poor circulation and many other mobility restrictions.

The smooth and easy Single Motor action enables the footrest to be fully raised before the back starts reclining. It also allows the sleeping position to be reached (less reclined than on Dual Motor designs) from a starting position 20cm from the wall.

The sophisticated Dual Motor mechanism enables you to control the backrest and footrest independently to reach the exact position you want including a near-horizontal full sleeping position (needs a 38cm gap from the wall).
